

Crystal naming — approval draft

Purpose: Propose one crystal (canonical) name per ingredient/product group so inventory, purchase requests, and recipe lines can align later.

Crystal format: AmharicScript|RomanizedAmharic|EnglishMeaning (example: ብሳል|Dabo|Bread). The middle part is Amharic written with English letters (romanization), not Latin-as-a-language. When Amharic is unknown: —|English|English.

Scope: Real tenants only (Apex Cafe and Restaurant / Apex Hotel illustration properties excluded). Sources: inventory registrations, inventory movements, purchase requests, stock-out snapshots, station stock, recipe ingredients, recipe consumptions.

Clustering (high care): different sizes never merge; packaging/serving roles stay separate (tea `` tea bag; coffee/coffe `` coffe 83A). Domain rules: shbo(cleaning)``shro/shiro(food); plain shro `` yeshro bakela `` yeshro ater `` mtn shro; flite``selit; kosta``pa matebiya shbo``Hshbo.

Important: This PDF is for review/approval only. No database or system changes were made.

Anti-overcorrection: prefer operator product knowledge; if English meaning is unknown, keep the local name (Akezha|Akezha). Do not merge lookalikes across products; do not split products the operator says are the same.

Stats: 7548 name hits · 951 unique spellings · 689 groups · 149 groups with multiple spellings · 3 tenants · 60 recommended additions (section C).

A. Groups needing spelling alignment (149)

C. Recommended additions (60) — proposed for fuller registration / purchase / recipe options

These are not observed inventory hits. They are candidate crystal names to add so pickers cover common kitchen, cafe, and store gaps. Dishes (kitfo, tibs, etc.) are intentionally omitted.
