

HotCol

Complete System Workflow Guide for Sales

የሆትኮል ስርዓት አጠቃላይ የስራ ፍሰት መመሪያ

This guide explains the whole HotCol platform for our sales representatives. It covers the 6 HotCol applications, how a property uses them day to day, and the exact workflows you can present to clients — in English and Amharic, side by side.

ይህ መመሪያ የሆትኮልን ፕላትፎርም በሙሉ ለሽያጭ ቡድናችን ያስረዳል። ስድስቱን የሆትኮል መተግበሪያዎች፣ አንድ ሆቴል ወይም ካፌ በየቀኑ እንዴት እንደሚጠቀምባቸው እና ለደንበኞች ልታቀርቡት የሚችሉትን የስራ ፍሰቶች በእንግሊዝኛና በአማርኛ ያብራራል።

1. What is HotCol? / u® •õ•Í?

HotCol is a multi-property hospitality management platform for hotels, cafes & restaurants. One company signs up once and gets a suite of connected applications that share one database: staff apps, guest apps, an owner mobile app, and an admin/Apex dashboard.

ሆትኮል ለሆቴሎች፣ ለካፌዎችና ለሬስቶራንቶች የተዘጋጀ የሆስፒታሊቲ አስተዳደር ፕላትፎርም ነው። አንድ ድርጅት አንድ ጊዜ ተመዝግቦ ሁሉንም መተግበሪያዎች ይጠቀማል — የሰራተኞች፣ የእንግዶች፣ የባለቤት እና የአስተዳዳሪ መተግበሪያዎች፣ ሁሉም በአንድ ዳታቤዝ ላይ ተገናኝተው ይሰራሉ።

App	Who uses it	What it does
hotcol-user	Manager, Reception, HR, Finance, Store,	Core staff app: hotel operations, cafe, HR, finance,
hotcol-waiter	Waiters (cafe/restaurant)	Take table orders from phones; request payment
hotcol-room	Hotel guests (in-room)	Guest portal: order food/laundry, see bill, complain,
hotcol-emp	Hotel/cafe employees	Employee self-service: attendance, leave, payslips,
hotcol-ats	HR / hiring managers	Recruiting: post vacancies, receive applications, hire
hotcol-owner	Property owners	Mobile oversight: revenue, staff, inventory, approvals

2. The 6 applications in detail / 5õ5q p `\*ëÎ} `Ý-

hotcol-user — Staff Operations (the heart of the system)

The main application used inside the property. Roles: Manager (full oversight: occupancy, ADR/RevPAR reports, rate plans), Reception (check-in/out, active stays, bills), CMLeader (housekeeping assignments), Finance (payroll, credit, VAT), HR (employees, leave, payroll), HotelCashier & HotelStore (orders, cash-outs, stock). Every daily operation — a room sale, a cafe order, a staff salary — runs through this app.

በሆቴሉ ውስጥ የሚሰራው ዋና መተግበሪያ። ሚናዎች፡ ማኔጀር፣ ሪሴፕሽን (የመግባት/የመውጫ፣ ንቁ እንግዳ፣ ሂሳብ)፣ ጽዳት/ስራ ሐላፊ (CMLeader)፣ ፋይናንስ፣ HR፣ እያንዳንዱ የዕለት ስራ — የክፍል ሽያጭ፣ የካፌ ትዕዛዝ፣ ደመወዝ — ሁሉም በዚህ መተግበሪያ በኩል ይካሄዳል።

hotcol-waiter — Waiter Portal (cafe/restaurant)

Waiters sign in with a 6-digit passkey from their phone, take table orders, and send kitchen/bar tickets automatically. They cannot mark bills paid; they request payment approval from the cashier. Recipe stock is checked live, so a waiter can never sell an item whose ingredients are finished.

ዌተሮች በስልካቸው በ6-አሃዝ ፓስዊርድ ገብተው የጠረጴዛ ትዕዛዝ ይወስዳሉ፤ ኪቸን/ባር ቦራሱ ይደርሳቸዋል። ሂሳብ መዘጋትን አይችሉም — የክፍያ ፍቃድ ከካሽር ይጠይቃሉ። የምግብ ስቶክ በቀጥታ ይጣራል ስለዚህ ያለ እቅፎ ንጥ አይሸምም።

hotcol-room — Guest Portal (in the hotel room)

Each guest gets a one-time code. Inside their room they can order food and laundry, watch their live bill, call the front desk, file a complaint, and rate their stay at checkout. Everything they consume is posted automatically to their room bill in hotcol-user.

እያንዳንዱ እንግዳ አንድ ጊዜ ተሰጥቶት የሆነ ኮድ ያገኛል። በክፍሉ ውስጥ ሆኖ ምግብና ልብስ ማጠቢያ ማዘዝ፣ የቀጥታ ሂሳቡን ማየት፣ በሬውን መደወል፣ አስተያየት መደር እና በውጭ ሲወጣ ደረጃ መስጠት ይችላል።

hotcol-emp — Employee Self-Service

Staff log in to see their attendance, request leave, view payslips, track their requests through approval flow, and chat directly with HR. HR responds and moves requests through the same approval engine the manager uses.

ሰራተኞች ገብተው የሰራቡት ጊዜ፣ የእረፍት ጥያቄ፣ የደመወዝ ደረሳቸው ያያሉ፣ ጥያቄያቸውን በፍቃድ ደረጃ ይከታተላሉ፣ ከHR ጋር በቀጥታ ይወያያሉ። HR ተመሳሳይ የፍቃድ ሞተር ይጠቀማል።

hotcol-ats — Recruiting (Applicant Tracking)

Hotels publish vacancies with a per-property careers link. Candidates apply online with their CV. HR reviews applications, moves them through the pipeline, and hires — the new hire automatically appears as an employee in

the HR module with a portal OTP.

ሆቴሎች ቦታዎችን በኢንቴርኔት ላይ በቀጥታ የሚሰጡ ማስፈንጠሪያ ያትማሉ። እጩዎች በመስመር ላይ ከCV ጋር ያመለክታሉ። HR አይታዘበናል፣ በአይነቱ ያልፋፋል፣ መቅጠርን ያረጋግጣል — አዲሱ ሰው በራሱ ወደ ሠራተኛ እና ወደ ፖርታል OTP ይገባል።

hotcol-owner — Owner Mobile App

Owners open the Expo mobile app to see every property at a glance: revenue, occupancy, cafe sales, inventory value, staff, pending approvals, and subscription status. They approve payment proofs and manage staff logins — without touching day-to-day operations.

ባለቤቶች በኤክስፖ የሞባይል መተግበሪያ በቅርብ ጊዜ የሁሉንም ንብረቶች ገቢ፣ የመላከት ደረጃ፣ የካፌ ሽያጭ፣ የክምችት እሴት፣ ሰራተኞች፣ ፍቃድ የማጠባበቅ እና የምዝገባ ሁኔታ ያየሉ። የክፍያ ማረጋገጫ የጸድቃሉ፣ የሰራተኛ መግቢያ የስተዳድራሉ — የሰለጠነ ሰራ አይነት።

3. End-to-end workflows / “+M ¥5” +M è5+ M0v}

A. Hotel guest journey — from arrival to checkout

የሆቴል እንግዳ ጉዞ ከመግባት እስከ መውጫ

1 Reservation or walk-in

The guest books online/phone (source: website/phone/agency) or simply walks in. Walk-ins get a reservation with source 'walk_in'.

2 Check-in (Reception)

Reception creates the stay in hotcol-user: room(s), nights, rate plan, guest details. A guest OTP is issued for the room portal.

3 In-room services (hotcol-room)

The guest orders food/laundry from the room. Orders post to the room folio as bill lines and appear on live dashboards.

4 Housekeeping & maintenance (CMLeader)

CM app assigns rooms to cleaners; room statuses move vacant_dirty! cleaned! i reception in real time.

5 Checkout & payment

Reception finalizes nights, applies tax/rate plan, settles the bill (cash/bank/telebirr), prints receipt. Room becomes vacant_dirty.

6 Rating & reporting

The guest can rate the stay; the manager sees occupancy, ADR, RevPAR and walk-in vs booking-source reports in hotcol-user.

B. Cafe/restaurant service cycle

የካፌ/ሬስቶራንት የአገልግሎት ዑደት

1 Waiter takes the order (hotcol-waiter)

Order is checked against live recipe stock — unavailable dishes are blocked.

2 Kitchen/bar ticket

The order appears on Chef/Bar station screens; staff mark items served.

3 Payment (Cashier)

Waiter requests payment approval; the cashier confirms the payment method and closes the bill.

4 Stock & P&L

Recipe ingredients are consumed from inventory; daily revenue, station snapshots and cost control update automatically.

C. HR: hire !' onboard !' pay

HR: መቅጠር መግባት ደመወዝ

1 Vacancy & applications (hotcol-ats)

HR posts a vacancy; candidates apply with CV via the property's careers link.

2 Hire

HR hires an application — an employee record is auto-created with a portal OTP.

3 Employee self-service (hotcol-emp)

The employee marks attendance, requests leave, chats with HR; each request follows the approval flow.

4 Payroll (Manager/Finance in hotcol-user)

Payroll period runs: gross, allowances, deductions, attendance-based adjustment app.

D. Owner oversight

የባለቤት ቁጥጥር

1 Owner logs into hotcol-owner

Chooses a property and a report period.

2 Review

Revenue, occupancy, cafe sales, inventory value, staff, and open approvals update from the same live database.

3 Approve

The owner verifies subscription/payment proofs, which unlock module continuation.

E. Cost control (hotel supplies)

የወጪ ቁጥጥር (የሆቴል ግዥ)

1 Request

Department leaders raise purchase/stock-out requests.

2 Approval queue

Cost controller and manager approve in stages; vouchers are issued.

3 Receive & audit

Goods are received against approved vouchers; monthly snapshots track spending.

4. Role !” app quick map / “ !” p `* ë

Person	App they open	Key actions
Manager	hotcol-user	Reports (ADR/RevPAR/occupancy), rates, HR, approvals
Reception	hotcol-user	Check-in/out, bills, guests, police report
CMLeader	hotcol-user	Cleaning/maintenance assignments
HotelCashier	hotcol-user	Cash-outs, payment verification
Waiter	hotcol-waiter	Orders, payment approval requests
Chef/Bar	hotcol-user	Station tickets, stock
Employee	hotcol-emp	Attendance, leave, payslip, HR chat
HR	hotcol-user + hotcol-ats	Hire, attendance, payroll, leave
Finance	hotcol-user	Payroll, credit, VAT, cashouts
Guest	hotcol-room	Orders, bill, complaint, rating
Owner	hotcol-owner	Portfolio KPIs, approvals, payments

5. Sales talking points / è = ë - Õ - v }

- One platform for the whole property: hotel rooms + cafe + HR + finance — no separate systems to reconcile.

- Every app shares one live database — a sale in the cafe appears on the owner's phone instantly.
- Ethiopian-first: ETB, VAT, Fayda/national IDs, Amharic/Amharic-romanized item naming assistance (Crystal AI).
- Role-based access: the waiter sees only orders, the owner sees only KPIs, reception only the front desk.
- Built-in controls: recipe stock blocking, approval flows, OTP login, guest verification.
- Scale: multi-property, multi-tenant — one owner can manage many hotels/cafes from the owner app.

ዋና ዋና ነጥቦች፡ አንድ ሆቴል ሁሉንም በአንድ መድረክ ያስተዳድራል፤ ሁሉም መተግበሪያ በቀጥታ ተገናኝቷል፤ በኢትዮጵያ (ETB፣ VAT፣ ፋይዳ) የተዘጋጀ ነው፤ በማና የተከፈለ መዳረሻ አለ።

6. Test property credentials / è -+ c dv} ëî}

Shared test properties for sales demos. All staff passwords for these tenants: 12345678

ለሽያጭ ማሳያዎች የሚጠቀሙ የሙከራ ንብረቶች። ሁሉም የሰራተኛ የይለፍ ቃል፡ 12345678

Property	Username	Password	Role
Apex Cafe and Restaurant	apex	12345678	Admin
	apex_cash	12345678	Cashier
	apex_chef	12345678	Kitchen
	apex_bar	12345678	Barista
	apex_store	12345678	Store
Apex Hotel	apexHotel	12345678	Manager
	apexReception	12345678	Reception
	apexCM	12345678	CMLeader
	apexFinance	12345678	Finance
	apexHR	12345678	HR
	apexCost	12345678	CostControl
	apexStore	12345678	Store
	apexCash	12345678	HotelCashier
	apexChef	12345678	Kitchen
	apexBar	12345678	Barista
ApexAnalog cafe and restaurant	apexAnalog	12345678	Admin
	apexAnalogCash	12345678	Cashier
ApexAnalog Hotel	apexAnalogHotel	12345678	Manager
	apexAnalogHCash	12345678	Cashier

Other access types (OTP / passkey / owner)

ሌሎች የመዳረሻ ዓይነቶች

- Employee portal (hotcol-emp): employee logs in with HR-issued portal OTP (one-time code set by HR).
Example seeded OTP: Mulunesh Ahmed (Apex Hotel, Chef) !' OTP 87F7FK
- Waiter portal (hotcol-waiter): 6-digit waiter passkey, set per waiter (ChangeWaiterPasskeyButton). If passkey is empty, the waiter cannot log in until a passkey is assigned.
- Guest room portal (hotcol-room): 6-digit guest OTP issued at check-in by reception, unique per active stay.
- Owner app (hotcol-owner): owner accounts (e.g. apexOwner, bazOwner, gtOwner) — password set per owner, not the shared test password; ask Apex for owner credentials.

የሰራተኛ ፖርታል፡ በHR የተሰጠ OTP። ዌተር ፖርታል፡ 6-አሃዝ ፓስክይ። የእንግዳ ፖርታል፡ በሪሴፕሽን የተሰጠ OTP። የባለቤት መተግበሪያ፡ የራሱ የይለፍ

Role tester quick cases / “ ” * ë î }

Role	Username	Test this flow
Admin (cafe)	apex / apexAnalog	Full cafe dashboard, menu, reports
Cashier (cafe)	apex_cash / apexAnalogCash	Approve waiter payment requests, cash-out
Kitchen / Barista	apex_chef / apex_bar	Live station tickets
Manager (hotel)	apexHotel / apexAnalogHotel	Occupancy, ADR/RevPAR reports
Reception	apexReception	Check-in a guest, view active stays
CMLeader	apexCM	Assign room cleaning jobs
HR	apexHR	Add employee, run payroll period
Finance	apexFinance	Credit levels, VAT, cashouts
CostControl	apexCost	Approve purchase requests
Store	apexStore	Items, stock, suppliers
HotelCashier	apexCash	Payment verification

7. Key terms / A M C u

Term	Meaning
TIN	Taxpayer Identification Number — identifies each property/tenant
Sold nights	Number of nights actually paid by guests
Available	Rooms × days in the period (minus complimentary holds)
Complimentary	Rooms given free — counted as company cost
In-house	Guests currently checked in
Checked out	Guests who completed their stay
Walk-in	Guest who arrived without a prior booking
ADR / RevPAR	Average daily rate / revenue per available room
